

Dear Resident/Responsible Party,

Per CMS directive QSO-20-29 NH dated 5/6/2020, facilities are required to report to residents/responsible party instances of a COVID 19 confirmation of staff or resident within the facility.

On May 22, 2020 Saint Mary's East was notified of such a positive result.

Among the methods that we are using to mitigate chance of transmission are the use of Personal Protective Equipment, screening temperatures as well as any potential symptoms of staff and residents daily, avoidance of communal interactions, restricted visitation, continued COVID 19 testing as directed, and stringent cleaning and disinfecting practices.

We will continue to update you at least weekly on our current status as we continue to monitor the situation.

Respectfully,

Daniel Bucci
