Saint Mary's& COVID-19: Update #10

Good Afternoon,

Today, May 22nd, we received confirmation that an employee working at Saint Mary's East has tested positive for COVID-19. The individual has not been in the building for the last several days and is now in isolation at home. The employee was tested earlier this week and the positive test results were received on May 22nd.

Our initial response regarding the confirmed case among the employee has included:

- Notifying the Pennsylvania Department of Health.
- Notifying residents, families and other employees.
- Performing contact tracing activities to determine individuals who may have been exposed. We will contact you if we believe that your loved one is potentially at risk. If you have not been contacted, your loved one is not considered to be at risk.
- COVID-19 testing will be performed for residents and staff as identified through contact tracing, consistent with the guidelines from the Department of Health.
- All previous restrictions and policies remain in effect including restricted visitations, use of Personal Protective Equipment, daily screening for temperatures and symptoms among staff and residents, avoiding group activities, and stringent cleaning and disinfecting practices.

At this time there are no known cases among residents or employees at Saint Mary's at Asbury Ridge.

Please be assured we are following CDC and Department of Health protocol to help mitigate transmission and we are committed to keeping you informed. Our greatest concern is ensuring the health and safety of our residents and employees. We will continue to provide timely updates on our current status as we monitor the situation.

Thank you for your patience and understanding. As always, please contact us if you have any questions or concerns.
