Saint Mary's & COVID-19: Update #63

Hello,

Another brief update! Last Friday, 5/28, an employee at Asbury Ridge tested positive. Visitation was halted to conduct outbreak testing. No new positives were discovered during the initial round of testing and visitation resumed for all areas. However, we are continuing to conduct outbreak testing twice a week for at least 14 days. Both rounds of testing that were conducted this week came back negative for all residents and employees.

The Erie County positivity rate has been trending lower. The positivity rate mostly affects the frequency of routine testing – at 5% and below positivity rate, we test unvaccinated employees once per month (unless in outbreak status). The positivity rate does not affect the facemask requirement – facemasks must continue to be worn in our building regardless of vaccination status to protect the vulnerable population we serve.

Also, I have attached the upcoming menu for the week and the Activity Calendars instead of sending separately as I did when we had two campuses.

Thanks!
