Saint Mary's & COVID-19: Follow-Up Update to #70

Good Morning,

As many of you know, the initial outbreak testing conducted on Friday in response to the positive employee case of COVID-19 found no additional cases among employees or residents. Saint Mary's at Asbury Ridge was able to re-open to visitors on Friday evening in all areas of the facility.

As required, Saint Mary's will continue with outbreak testing twice a week for the next 14-days to ensure there is no further spread. Yesterday, on Mon. August 23rd, all residents and employees tested negative. Additional testing is scheduled to take place on Thurs. August 26th, Mon. August 30th and Thurs. September 2nd. If no additional cases are found, we can return to routine testing as determined by the positivity rate in the community.

Thank you.

Saint Mary's & COVID-19: Update #70

Good Morning,

This morning, an employee at Asbury Ridge tested positive for COVID-19 via our point-of-care testing.

Visitation is halted until further notice while the initial round of outbreak testing is completed today; this includes testing of all employees and residents. The results of this round of outbreak testing, as well as the locations and dates where the employee last worked, will determine reopening.

We will keep you updated on the status of the facility and today's results.

Thank you for your patience.
